Telli Impex

BEST QUALITY PRODECTS
NEW 2023

INTRODUCTION

At Telli Impex, we recognise that in an increasingly sophisticated and busy healthcare system, it is no longer sufficient to simply sell product. We actively seek to deliver cost-effective combinations of value added service interventions, tailor made solutions and highly innovative technical products, in a responsible and ethical manner.

However, our business is not only about selling or innovative solutions or value added services, it is also about seeking ways to assist the enhancement of patient care, and accordingly, improving patient outcomes. This is our ethos and through this core belief you know that when you deal with Telli Impex you can trust our people, our products and our service.

Telli Impex is a subsidiary of DCC plc, one of Ireland's leading companies, listed on the Irish and London Stock Exchanges.

SURGICAL INSTRUMENTS

Telli Impex are proud to offer the TI brand of quality surgical instruments. Established in 1920, Telli Impex surgical instruments are used and respected worldwide. Telli Impex offer a complete range of General surgical instruments, many made to our unique Telli Impex pattern, and specialise in Cardio-Thoracic, Vascular and Urology. Our dedicated, highly trained sales team will be happy to assist with all enquiries.

QUALITY ACCREDITATION

Telli Impex are compliant with the EU Directive 93/42EEC for surgical instruments and are ISO 13485:2003 accredited.

CLAMPS

Cardio-Vascular clamps main feature are their low tissue loading jaws that give security with a non-traumatic grip. All modern Cardio-Vascular instruments have teeth profiles which have been designed by eminent surgeons for surgeons as illustrated below.

Debakey

1:2 rows of teeth

Cooley

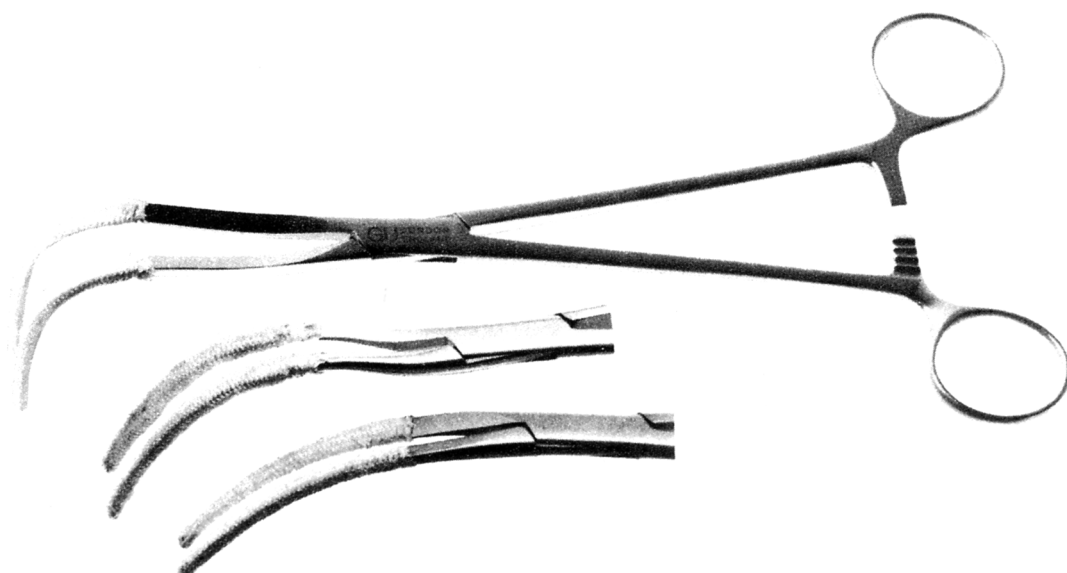

2:3 rows of teeth

Dardik

FORCEPS

Forceps within this catalogue are in three main groups:

TISSUE FORCEPS

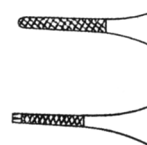

As their name suggests are used for grasping and holding various types of tissue as an aid to retraction.

DISSECTING FORCEPS

Are used for temporarily holding tissue between their jaws to aid in dissection or manipulation. They come with toothed jaws for added grip, non-toothed jaws for handling tissue, and atraumatic jaws for minimal trauma.

ARTERY FORCEPS

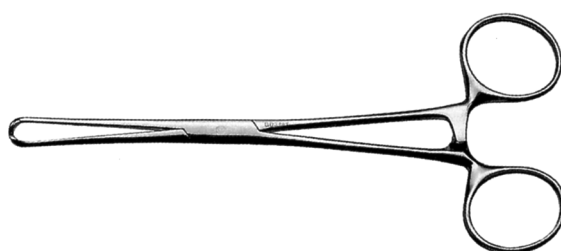

Also called Haemostats (blood stops) mainly used for clamping arteries. They can also be used as a dissecting aid.

Adson

A short delicate forcep for close grasping and dissection procedures.

NEEDLE HOLDERS with TUNGSTEN CARBIDE INSERTS

A guide below to help choose correct needle holder for appropriate suture use.

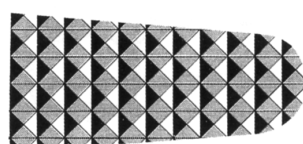

(C)

Coarse 0.65mm

Maximum holding capabilities for heavy needles or wire

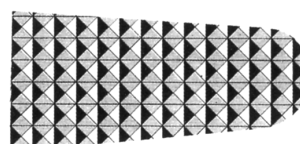

(S)

Standard 0.5mm

For needles 3-0 and larger

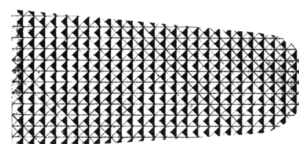

(F)

Fine 0.4mm

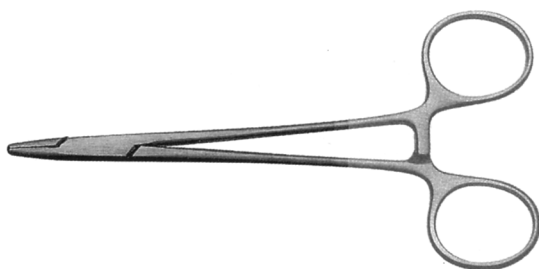

For needles and sutures between 4-0 and 6-0

(M)

Micro 0.2mm-0.3mm

For delicate needles and sutures between 7-0 and 10-0

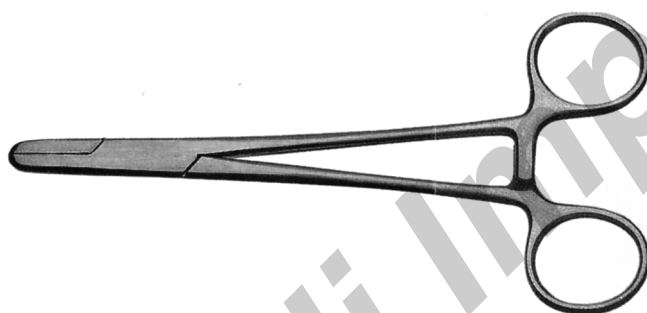

Baumgartner

Small light medium needle holder ideal for peripheral procedures.

Size	
CM	Inch
14	5½

Product Code
GU3327

Berry

Used for gripping sternal needles and wires.

Notes

Telli Impex

SCISSORS

The scissors within this catalogue can easily be identified as follows:

STAINLESS STEEL

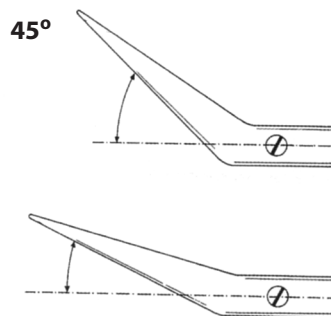

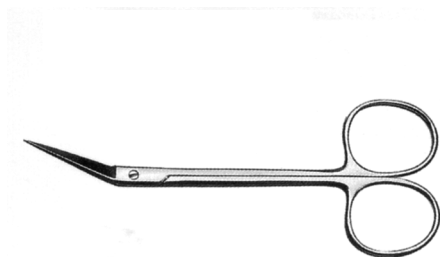

High quality stainless steel scissors.

SUPERCUT

One edge of the scissor is micro serrated to enhance tissue grip in cutting. The other edge is honed (ground sharpened) to ensure precise cutting control. The identifying feature of these scissors are part coated black bows (handles).

TUNGSTEN CARBIDE

These very high quality scissors have tungsten carbide inserts which allow the blades to be sharpened to a high standard thus extending the life of the scissor. The identifying feature of these scissors are gold plated bows (handles).

Bell Profunda

Femoral scissors short precise control, cutting action used in femoral popliteal anastomosis incisions. 11 cm (4½") long.

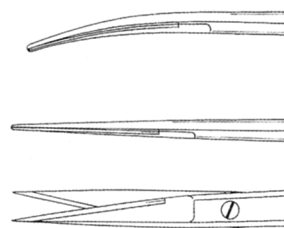

Angle	Tungsten Carbide	Product Code Stainless Steel	Supercut

Miller Integrated Cystoscope

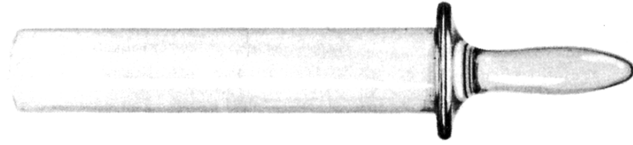

This unique endoscope incorporates the latest innovations in optical and mechanical design. The instrument is ideal for local anaesthetic endoscopy. The unique endo needle provides for the first time the possibility of direct injection of local anaesthetic or vaso-active agents.

Miller Integrated Cystoscope

It's small calibre (17.5 charriere), smooth profile and large instrument channel permits the Urologist to biopsy, diathermy, apply electro hydraulic probes, cut the urethra and catheterise the ureters with specially designed accessories under perfect optical control. The simplicity and robustness, combined with superior optics, irrigation and a working channel which allows a range of rigid forceps to be passed, makes this the obvious choice over its fibre optic competitors. An instrument for Outpatients and General Anaesthetic Endoscopy, this is well tolerated by the patient, and preferred by the Urologist.

Diathermy Quiver

All purpose diathermy quiver.
Sold as box of 40

Length	
CM	Inch
23	9

Product Code
GUS1503

Minnesota 4 Lumen Tube (not illustrated)

For use in cases of Gastro-Intestinal bleeding.
Sold individually

Product Code
9222

Other Single Use products may be available. TI also has a dedicated Endoscopic Division. Please phone for details. Freephone **0800 212827**.
